Claude Cowork Pack

Set up Claude to finish whole tasks for you, now that chat and Cowork are one app.

What changed

On 16 September 2026 Anthropic announced that Claude Cowork and chat are merging into one Claude.

- No mode to pick. Claude decides if a quick answer or a longer task fits.
- Pro and Max first. Team and Free later. Enterprise gets 30 days' notice.
- Once your account moves over, you can't switch back.
- Cowork tasks, projects, connectors, skills and files carry over.

Chat vs Cowork

	Chat	Cowork
For	Questions, drafts	Whole tasks, many steps
Output	Answers in the chat	Finished files
Runs while you're away	No	Yes
Local files	No	Yes, in Claude Desktop

After the merge: both, in one conversation.

When to use what

- **Desktop** when the task needs files on your computer or the browser. Web and phone reach your connected apps only.
- **Manual** (default): Claude asks before each action. Use **Auto** only for tasks you trust.
- **Claude Code** for software work in a repository.

What Claude can do on a longer task

- Search the web, read your files, run code
- Keep running in the cloud after you close the laptop
- Return Word, Excel and PowerPoint files
- Use Drive, Gmail, Microsoft 365, Slack
- Run on a schedule, e.g. every Monday at 8

Set it up in 20 minutes

1. Write your Instructions for Claude (Settings > General)
2. Connect the 2 or 3 apps your work lives in
3. One folder per recurring job: inputs, output, scratch
4. Brief the first task: outcome, format, inputs
5. Schedule one weekly report, on Manual

A brief that works

```
Outcome: a comparison of five project
tools
Format: a spreadsheet + half-page summary
Inputs: web research, ./inputs/process.md
Limits: no trial sign-ups
Done when: every row has a source link
```

The pack has templates for this, for instructions, folders and scheduled tasks.

Safety habits

- Start every new kind of task on Manual
- Give Claude the smallest folder that does the job
- Keep originals where Claude doesn't edit
- Review each step when it sends messages or changes important files
